Hi Hal,

As long as the bait used is an existing formulation, then we should be able to meet the 3 month review for you. You would just need to include the appropriate data that would be required for a new registration. So you would only need to send in two registrations which makes it easier for you and us. But if the bait formulation is new, then it would take longer than the 3 months. Thanks for checking with us first and I hope you find this helpful.

Subject: RE: Question from Reckitt

Jennifer,

Ok great! Here's the status....

We have two brand new registrations that we should be ready to submit next week - they are our first bait + bait stations combinations that are fully compliant with the rodenticide mitigation measures. There are two different designs --> therefore, two registrations.

We have data to support a Tier 3 station design (child and adult packaging testing).

My understanding is that this would be a 6 month review for each registration.

Here is the question:

Due to "stuff" going on with New York State interpretation of the mitigation measures, we really need a 3 month federal review to make our timing work. We need to be on shelf in NY with these stations by May 2010. So, the question was raised if we should submit these registrations as both a Tier 4 station (3 month review) and a Tier 3 station (6 month review) --> therefore, 4 registrations. The Tier 4 station would get us on shelf on time --> and we would then "upgrade" that to the Tier 3 language 3 months later.

I told Marketing that I would instead first call you and see if (1) I had the timings right and (2) would it be possible to achieve a

3-4
month review for a Tier 3 station for two registrations instead
of
sending you in 4 stations at once.

Make sense?

Let me know when a good time would be for me to call you to
further
discuss.

Hi Hal,

Yes I will be in the office today until 2:30. Did you want to
send me
the reg numbers and I can look up the info for you?

Subject: Question from Reckitt

Jennifer

Are you going to be in the office on Friday, May 29?

I have a quick - well hopefully quick - question on PRIA timings
for
some new registrations on d-Con.
